

FORWARD OSMOSIS - HYDRATION PRODUCT - DISTRIBUTION AGREEMENT HTI WITH FUTURE TECHNOLOGIES L.L.C.

UAE, Dubai, October 2011

Hydration Technology Innovations, LLC (HTI), the world's only commercial manufacturer of Forward Osmosis (FO) membranes, modules and systems reached an International Distribution, Services and Cooperation Agreement for FO Technology with Future Technologies L.L.C., out of Dubai.

Future Technologies will distribute HTI's Hydration Products using FO OsMem™ Membrane Technology and provides for the Middle East Region a full suite of Forward Osmosis Emergency Hydration Products used by the Military, in Humanitarian Disaster relief and sold in Retail Stores for personal hydration.

To use the HydroPack, just drop it in a puddle of water and wait. It's that simple. The osmosis membrane draws in water, rejecting even the worst contaminants you might find in water. It takes about 10 hours for the pouch to self hydrate. When the pouch is full, you have 12 ounces of electrolyte-enriched water ready to go. All you have to do is poke the included straw into the pouch and drink.

HTI's Hydration Packs are small, portable and simple to use with no moving parts or filters to break - the HydroPack makes a valuable piece of emergency gear

Future Technologies L.L.C. at a glance

Future Technologies L.L.C. is a leading provider of clean Water Technologies , Systems and Solutions to the industries in the Middle East & North Africa (MENA) with main focus on the Oil & Gas and Energy Industry .
